PROFESSIONAL SUMMARY

PHP and WordPress Developer with 5+ years of experience building and maintaining production websites and web applications. Specializes in custom WordPress theme and plugin development across monolithic and headless (WordPress + Next.js) architectures, with Drupal, Laravel, and PHP backends. Delivered 8+ client websites, including a 10+ region multilingual corporate site launched in about one month, and raised team productivity by approximately 35% through workflow automation. Experienced in REST API and third-party integrations, technical SEO, performance optimization, and mentoring junior engineers.

TECHNICAL SKILLS

PHP & Backend: PHP, Laravel, REST APIs, MySQL, MariaDB, PostgreSQL, Node.js

CMS: WordPress, Drupal, FilamentPHP

Frontend: JavaScript, TypeScript, jQuery, HTML5, CSS3, Tailwind CSS, React, Next.js, Vue.js, Nuxt.js, Vuetify

Integrations & SEO: Stripe Payment Integration, Third-Party API Integration, AI API Integration, Google Tag Manager (GTM), Technical SEO, Localization

Tools & Workflow: Git, GitHub, Docker, UAT, Agile/SDLC

WORK EXPERIENCE

Web Developer

RushHour Digital Ltd. | Remote | April 2024 – Present

- Deliver and maintain 5+ client websites on WordPress (monolithic and headless with Next.js) and Drupal + Next.js, owning builds from development through production deployment.
- Build custom WordPress themes and plugins in PHP, extending CMS functionality and exposing custom API endpoints to meet client-specific requirements.
- Integrate third-party payment, email, and analytics services, and configure technical SEO and Google Tag Manager across all client sites.
- Improve Core Web Vitals and page performance through asset optimization, caching, and query tuning, raising Lighthouse performance scores to 90+ on key pages.
- Partner with designers and project managers to implement client UAT feedback, resolve production issues, and ship ongoing enhancements.

Intermediate Software Engineer

Simplevia Technologies Inc. | Pasig City | March 2023 – April 2024

- Developed and maintained three production systems: Makati AIS (Accounting Information System), Makati E-Sign (digital document signing), and LMIIS (Logistics Management Inventory and Information System).
- Automated accounting and payroll document review, approval, and processing, increasing team productivity and task completion by approximately 35%.
- Owned features across the full SDLC, gathering requirements with users, analysts, and stakeholders to meet UX, business, and compliance needs.
- Mentored junior engineers as a senior-level resource and advised other development teams on application design and issue resolution.

Junior Software Engineer

Revlv Solutions Inc. | Makati City | January 2021 – February 2023

- Delivered 5+ custom web applications in a four-person team, including a Document Archiving system, a membership system for Astoria Vacation & Leisure Club (AVLCI), a Farmer Information System, and RisToken.
- Built and maintained frontend and backend features across the full SDLC, from design and implementation to testing, deployment, and documentation.

- Managed version control, code integration, and frequent server releases through Git-based workflows.
- Diagnosed and fixed application defects, reducing recurring production issues by approximately 20%.

PROJECTS

Equities First | WordPress – Multilingual Corporate Site | 2026

- Built a multilingual WordPress site serving 10+ regional editions in 6 languages, including English, Arabic, Thai, Korean, and Simplified and Traditional Chinese.
- Co-developed and launched the site in approximately 1 month alongside one other developer.
- Continue to deliver enhancements, bug fixes, and content updates post-launch.

DayOne DC | Headless WordPress + Next.js | 2026

- Architected and built a headless WordPress CMS powering a Next.js frontend, independently taking the site from implementation to production deployment.
- Launched the core site in approximately 1.5 months, including two rounds of client UAT revisions, plus a companion one-page microsite.
- Handled content migration, CMS updates, and post-launch maintenance and enhancements.

Ural Uramet | WordPress | 2025

- Built a custom WordPress theme from approved designs, delivering a fully responsive site independently to specification.
- Partnered with designers and project managers through development, testing, and launch.

Lexibook | Drupal + Next.js – Multilingual E-commerce | 2025

- Developed and maintained features for a multilingual e-commerce platform built on Drupal with a Next.js frontend, within a cross-functional team.
- Implemented English and French localization for a bilingual customer base.
- Improved product search and navigation, reducing the steps needed to reach a product page.
- Optimized frontend and backend performance, cutting average page load time by approximately 30%.

Optism | Drupal + Next.js | 2024

- Delivered UI, functionality, and performance improvements to an existing Drupal + Next.js site as requirements evolved.
- Diagnosed and resolved site issues to improve stability and user experience.

EDUCATION

Bachelor of Science in Information Technology
University of Caloocan | Caloocan City | 2020
